Section 1—Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Introduction:

This is the Conflict Minerals Disclosure of Neogen Corporation (“Neogen” or the “Company”) for calendar year 2014. Certain terms in this report are defined in Rule 13p-1.

In accordance with Section 1502 of the Dodd Frank Wall Street Reform and Consumer Protection Act (“Act”) governing conflict minerals, registrants must determine whether any of the conflict minerals (defined by the Act as Tin (Cassiterite), Tungsten (Wolframite), Tantalum (Columbite-Tantalite or Coltan) and Gold (the “3TGs” or “Conflict Minerals”)) are necessary to the functionality or production of its manufactured products. If so, the registrant must conduct a Reasonable Country of Origin Inquiry (“RCOI”) to determine whether any of the Conflict Minerals in its manufactured products originated in the Democratic Republic of the Congo (“DRC”) or an adjoining country (together with the DRC, the “Covered Countries”).

Description of Neogen’s Reasonable Country of Origin Inquiry (‘RCOI’)

Neogen has designed and implemented a conflict minerals compliance plan that is intended to comply with Rule 13p-1. Neogen has taken the following steps:

1. Developed a strategy based upon OECD guidelines to meet the legislative requirements
 - a. Established a dedicated conflict minerals project team to address reporting requirements and embed a sustaining process for the future. This team is responsible for periodically briefing senior management about the results of our due diligence efforts.
 - b. Reviewed the project design and implementation plan to ensure a structured approach and methodology has been followed.
 2. Identified Neogen’s suppliers of conflict minerals and conducted RCOI
 - a. A review of Neogen’s products was carried out using Company product databases which provide details of the composition of Neogen’s end products, in order to identify any that contain conflict minerals. During our 2014 review, we identified two conflict minerals utilized in various raw materials that were components of Neogen’s end products in 2014; gold, used in the Company’s diagnostic products, and tin, a component of certain rodenticide formulations. Using information from the company’s procurement systems, the company identified three suppliers who fell within the scope of our RCOI.
 - b. Neogen contacted those suppliers of the identified raw materials to attempt to determine where the 3TGs are sourced. Neogen exercised due diligence over the RCOIs received from its suppliers, and additional inquiries were made as necessary. No supplier informed Neogen, in response to Neogen’s due diligence inquiries, that it obtained Conflict Minerals from the DRC or an adjoining country. Certain suppliers, however, responded with limited negative assurance with respect to the sourcing of their products country of origin. The suppliers who did not respond adequately are being further engaged to provide an acceptable response to our internal conflict minerals team.
 3. Institutionalized a process to continue to improve future reporting
 - a. Neogen intends to undertake the following steps to mitigate the risk further that its necessary conflict minerals benefit armed groups in the DMC or adjoining countries:
 - i) Continue to engage and collaborate with suppliers to obtain current, accurate, and complete information about the supply chain, and allow the Company to track the sourcing of conflict minerals with greater precision.
 - ii) Include a conflict mineral clause in new or renewed supplier contracts.
-

- iii) Enhance the composition and training of the internal Neogen group leading Neogen's conflict minerals compliance efforts.

Results of Neogen's Reasonable Country of Origin Inquiry

In accordance with the Act, as a result of the information the Company received from its suppliers for calendar 2014, Neogen was not able to determine with certainty the country of origin of some of the Conflict Minerals in its manufactured products, but has no reason to believe its necessary conflict minerals may have originated in the Covered Countries for products manufactured in calendar year 2014, all within the meaning of the Act.

The information in this report is also available on the Neogen website at www.neogen.com under "Investor Relations, Conflict Minerals Disclosure."
